

FAST | EASY | AFFORDABLE | SAFE | RELIABLE

TruTip DNA Starter Kit for *Mycobacterium tuberculosis*

OVERVIEW

Nearly every life science research and molecular diagnostic laboratory requires a rapid and robust means of extracting DNA. The Akonni TruTip DNA Kit for *Mycobacterium tuberculosis* delivers inhibitor-free, PCR-ready DNA in as few as four minutes, starting from liquid or solid culture or sputum.

With TruTip Starter Kits, we make it easy to get started. TruTip Starter Kits provide enough TruTips and buffers to perform 60 extractions. As an added bonus, with a TruTip Starter Kit, you receive a **RAININ® 200-2000µL EDP3-Plus™ Advanced Electronic Pipette with LTS®** and wall power supply.

TO ORDER

TruTip Starter Kit:

300-10105 **Starter Kit - TruTip DNA Kit for *Mycobacterium tuberculosis* (60 LPT)** includes TruTip LPT tips and buffers for 60 extractions on MTB species. Starter kits include a RAININ 200-2000µL EDP 3-Plus Advanced Electronic Pipette with LTS and wall power supply.

300-10104 **Starter Kit—TruTip DNA Kit for *Mycobacterium tuberculosis* (60 SPT)** includes TruTip SPT tips and buffers for 60 extractions on MTB species. Starter kits include a RAININ 200-2000µL EDP 3-Plus Advanced Electronic Pipette with LTS and wall power supply.

Additional TruTip Products:

- 300-10101** **TruTip DNA Kit for MTB (60 LPT)** includes TruTip LPT tips and buffers for 60 extractions on MTB species.
- 300-10100** **TruTip DNA Kit for MTB (60 SPT)** includes TruTip SPT tips and buffers for 60 extractions on MTB species.
